## **DETAILED ACTION**

In response to the amendment filed 4/23/2004, all the amendments have been entered and the action follows:

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-11, 20-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawamura et al (US 5821997) in view of Ito et al (US 6453071).

With respect to claims 1, 3-11 and 20-28 the rejections are maintained and incorporated with reference as set forth in the previous office action paper number 6.

### ***Response to Arguments***

3. Applicant's arguments filed 4/23/2004 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir.

1986). In the instant case, applicant argues that the reference Kawamura and Ito fails to disclose or suggest a display means that displays selectively a input image and the compression encoded/decoded image, and also, fails to disclose the difference image, (see page 8 paragraph 2 and 3, page 9 paragraph 1). Examiner disagrees and would like to point out that the claimed limitations are given their broadest reasonable interpretations. In the instant case, Kawamura discloses the input means for inputting images, compression encoding the input images, recording the compression encoded images and decoding the compression encoded images and displaying the decoded images (see figure 1, and col. 2. lines 39-48, col. 3, lines 12-15 and figure 2B) as claimed. And, Ito teaches selectively displaying the input image data and the compressed encoded image data, (see col. 17, lines 2-6, also, figure 22, numerical 68 there is an adder that means the images could easily be added or obviously be subtracted as required, as claimed in claims 12, 19, 21 and 26) as claimed.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2623

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
